

Certification report

Introduction

The certification report is part of the project documentation. It is prepared by the certifying organisation prior to project implementation (ex-ante). The certification report confirms the verification of the project description for the specific project and the compliance with the criteria of the Natur^{plus} standard. The certification report is presented in the form of a checklist.

The test report is adapted to the conditions of the AgoraNatura platform. If all questions are answered positively, compliance with the criteria is confirmed. There is space for comments at the end.

The verification of the correctness or validity of the contract-relevant information provided in the project description shall be carried out in accordance with the principle of good faith.

Project data

Project ID:	
Project title:	
Subtitle	
Project type	

Verification of compliance with the criteria of the standard

Formal

Location of the project area is clearly indicated.	
The bidder agrees to the publication of the specific location of the project area.	
Extent of the project area is clearly indicated.	
Duration of the project is clearly stated.	

General information on the project description and the measures

The project objective and baseline condition are described in a comprehensible and plausible manner.	
Reference use and scenario are described and plausible.	
It is shown which additional measures will be implemented.	
The measures are plausible.	
Possible information on protected species is plausible.	
The above decision to publish or not to publish the specific location of the project site is approved.	

Planned results

	Plant diversity	Animal diversity	Gene diversity	Pollination performance	Climate performance	Water output
The following nature services were selected						
It is plausibly described what is to be achieved.						
The value categories chosen are based on the criteria for classification.						
The reference scenario was adequately considered.						
The facts and figures mentioned are plausible.						
The planned outcome monitoring is assessed as appropriate.						
The methods used and planned are recognised.						

Experience the project

The project can be experienced, the area is accessible via a public path and/or the provider grants other opportunities to experience the project.	
--	--

Project provider

The name of the provider / supplier is given	
--	--

Final declarations

The sustainability of the project is recognised.	
If an exceptionally high development claim is indicated, this can be confirmed.	
Provider confirmed,	
<ul style="list-style-type: none"> • that the rights of use are secured for the entire duration of the project. 	
<ul style="list-style-type: none"> • that the remuneration of existing obligations is excluded. 	
<ul style="list-style-type: none"> • that the completeness and accuracy of all information in the project description is given. 	
<ul style="list-style-type: none"> • that all calculations and estimates were made conservatively. 	

Certification result

The comments of the certifying person are submitted on an informal extra sheet, if applicable. They can then be found in the appendix.

- ✓ The certification was successfully completed.
- Some points in the planning and/or project description should be revised.

Date, name and signature of certifying person

With their final signature, the certifying person also confirms that they are independent of the underlying offer.

Stamp, date and signature of the certifying institution

The certifying institution confirms with its stamp and final signature that all information is correct and that the certification has been completed.
